

# Introducing the St. Sigma Simulation

# Today's Agenda

- Advanced Blended Learning & Simulations
- What is St. Sigma
- Suggestions for Use
- St. Sigma – live demo
- Perspective from Dale Schattenkirk
- Q & A

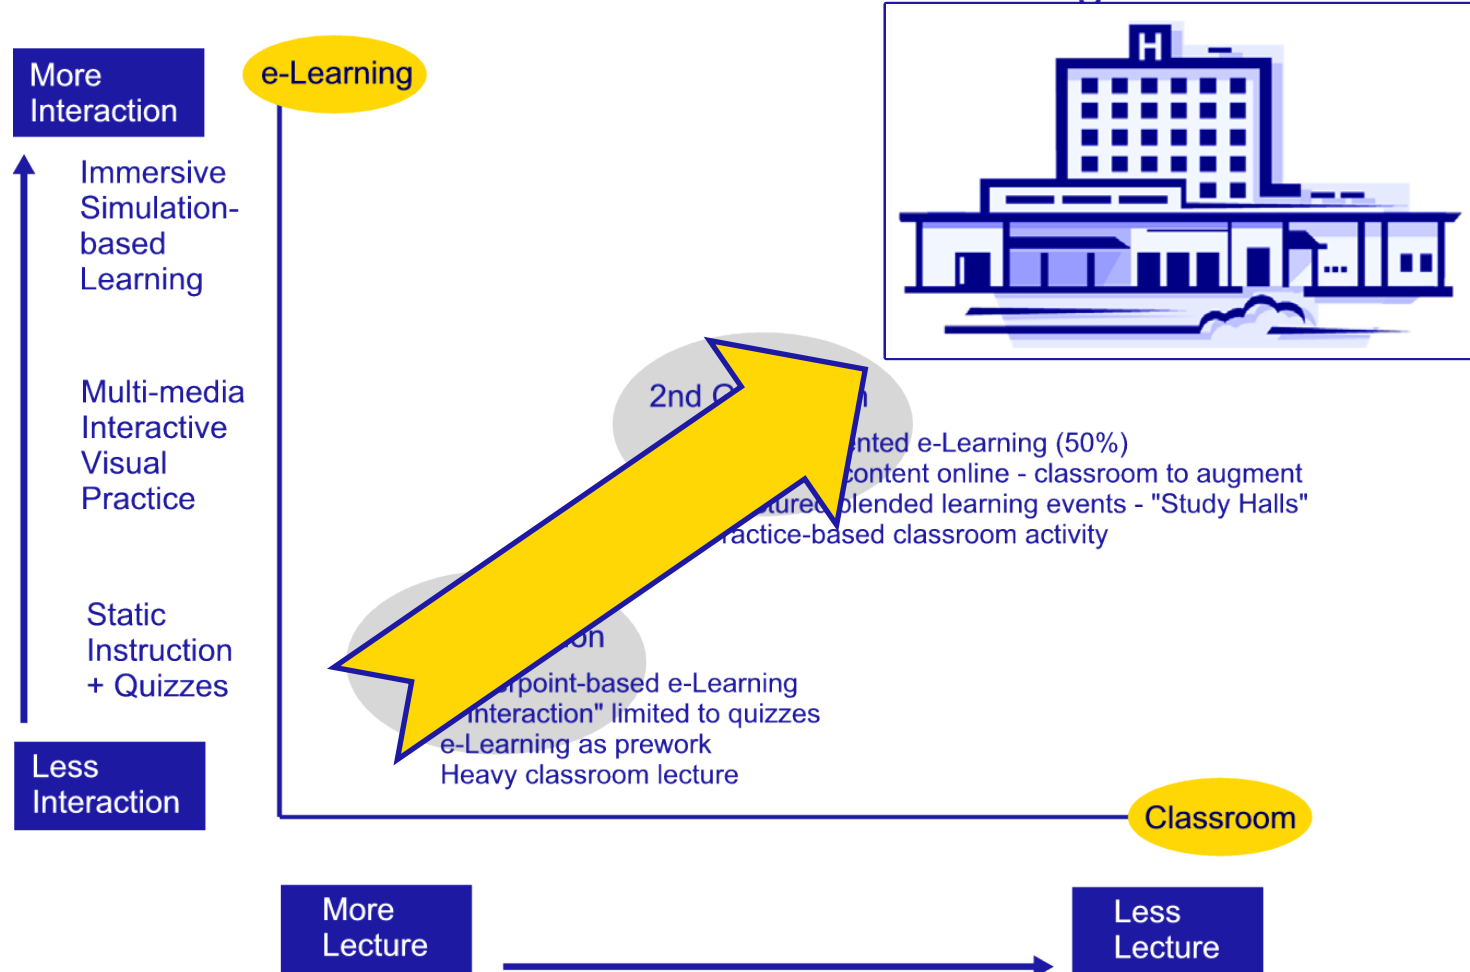

# MoreSteam.com – Company Background

- Founded 2000
- Over 300,000 Lean Six Sigma professionals trained
- Serving over 50% of the Fortune 500
- First firm to offer the complete Black Belt curriculum online
- Courses reviewed and approved by ASQ
- Registered education provider of Project Management Institute (PMI)

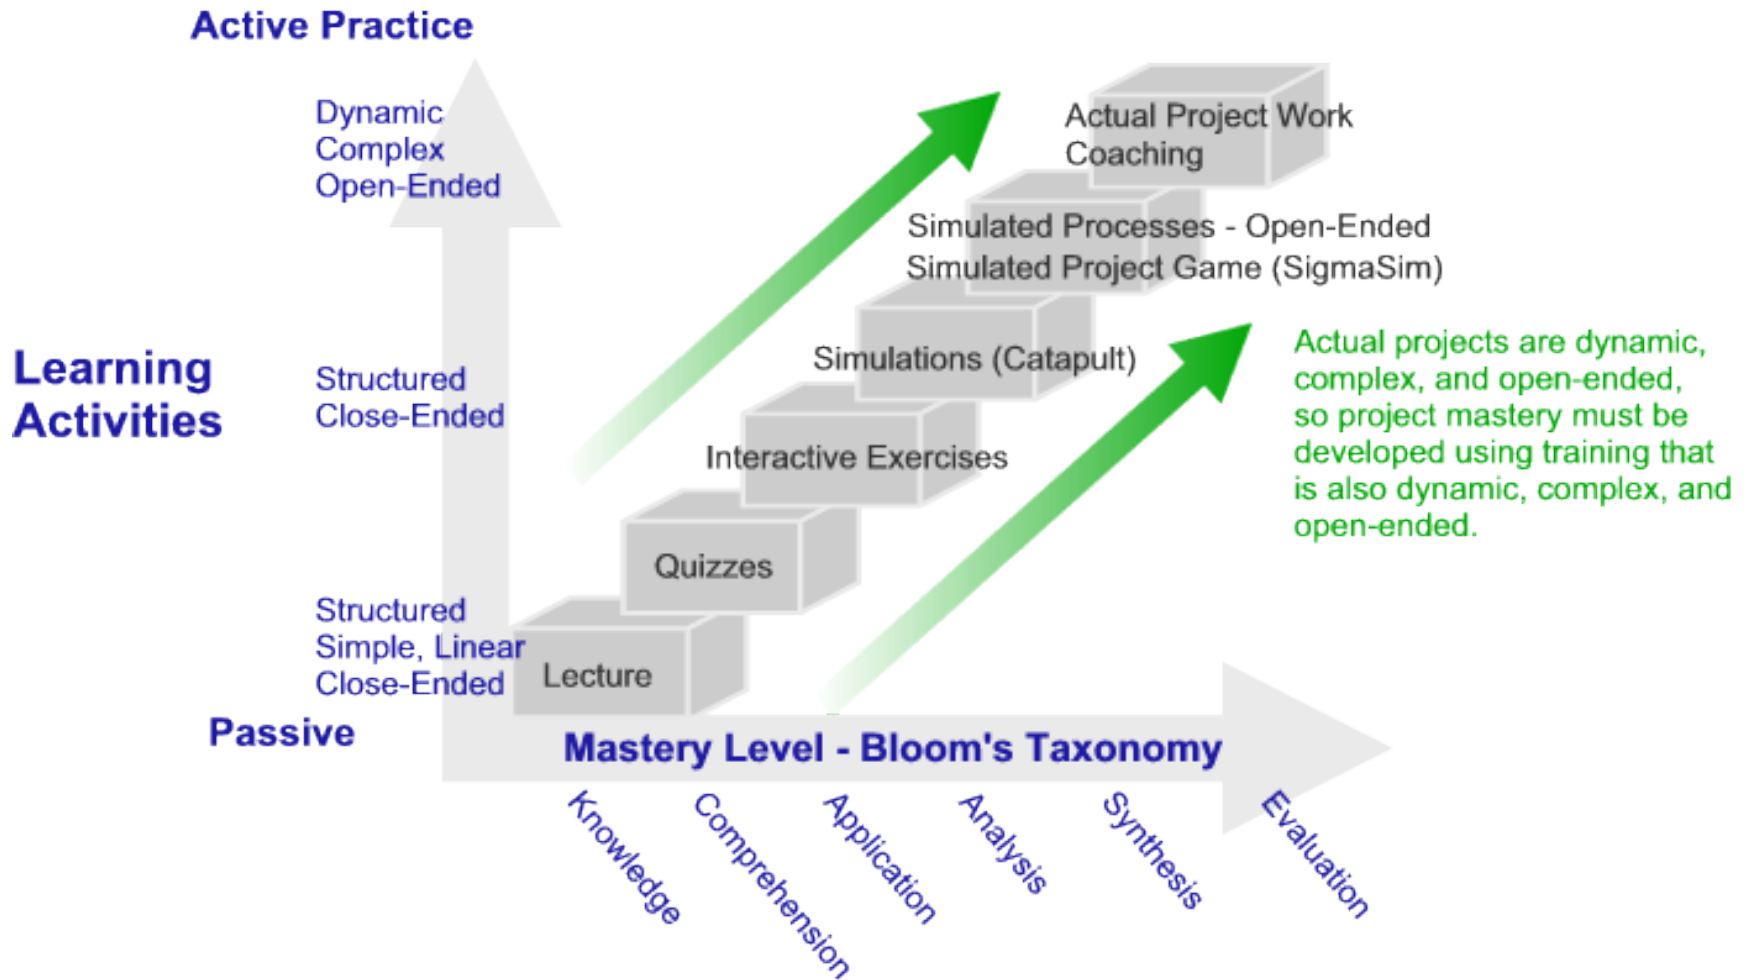

# Advanced Blended Learning

## Generations of Blended Learning

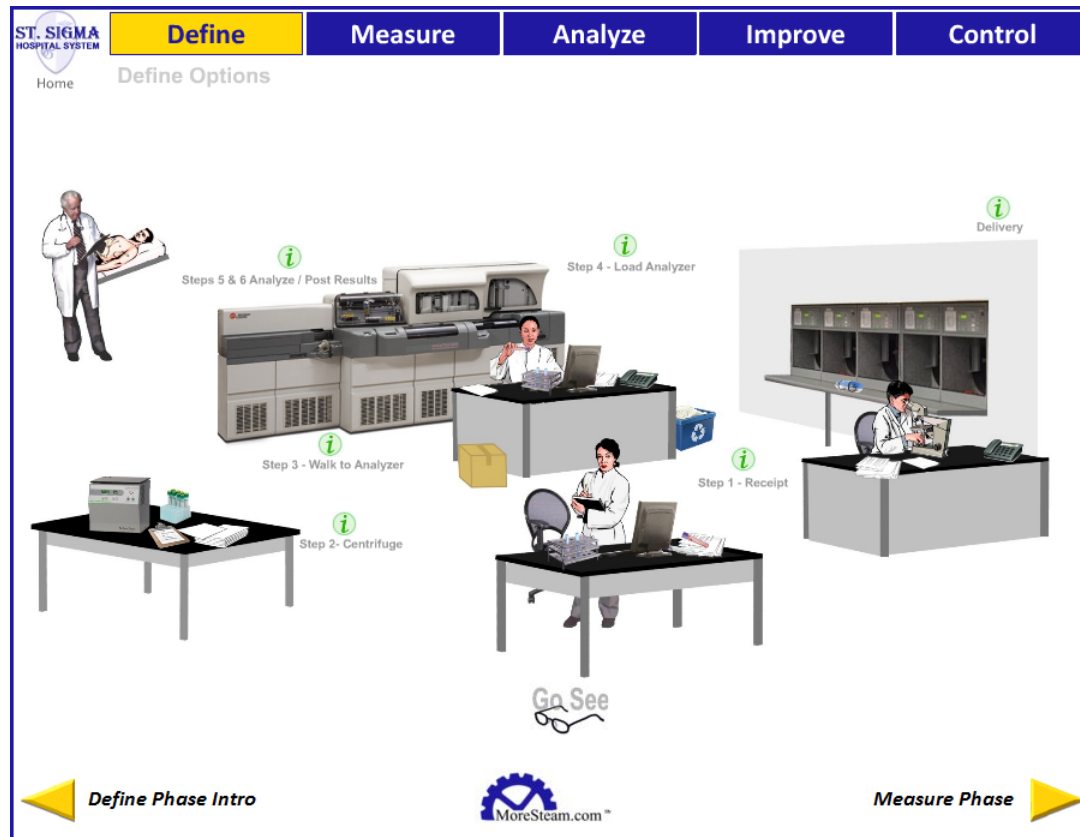

# Complex Skills Require Complex Practice

# What Is St. Sigma?

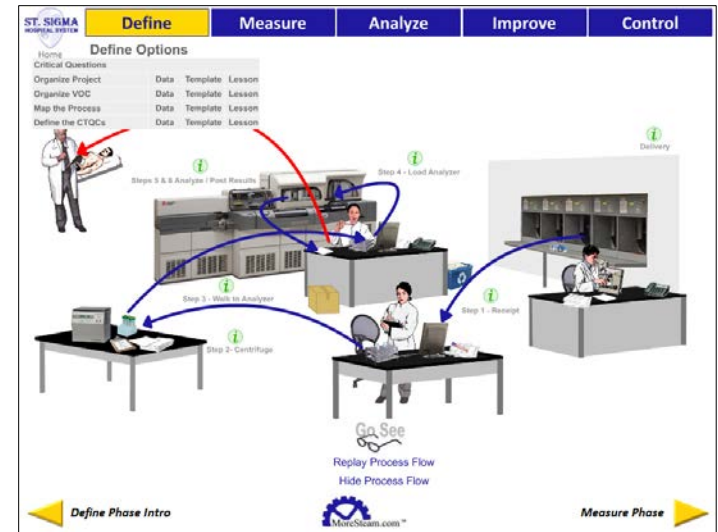

## A data-rich, process improvement case study

# A Versatile Simulation

St. Sigma fills the gap when you need:

- A case study with a *single* story line and is based on an actual project
- Flexible learning objectives for a variety of audiences
- Practice opportunities for JIT training or longer workshops
- Refresher training

# Other Advantages

- 27 tools and data sets included
- Useful with any data analysis software
- Instructor solution files included
- Simple architecture that does not require IT support or new software

	A	B	C	D	E
1	Observation	Hour of Day (24 hr)	Glucose Test Process Total Cycle Time - Minutes	Order Priority	
2	1	0	48.21	Stat	
3	2	0	79.92	Normal	
4	3	0	53.96	Stat	
5	4	0	51.62	Normal	
6	5	1	62.09	Stat	
7	6	1	40.60	Stat	
8	7	2	58.07	Stat	
9	8	2	34.61	Stat	
10	9	2	42.32	Stat	
11	10	2	34.17	Stat	
12	11	3	36.33	Stat	
13	12	3	55.13	Normal	
14	13	3	48.49	Normal	
15	14	3	59.14	Stat	
16	15	3	100.95	Normal	
17	16	4	48.84	Stat	
18	17	4	66.13	Normal	
19		4	25.29	Stat	

# *Who Would Use St. Sigma?*

Do you need:

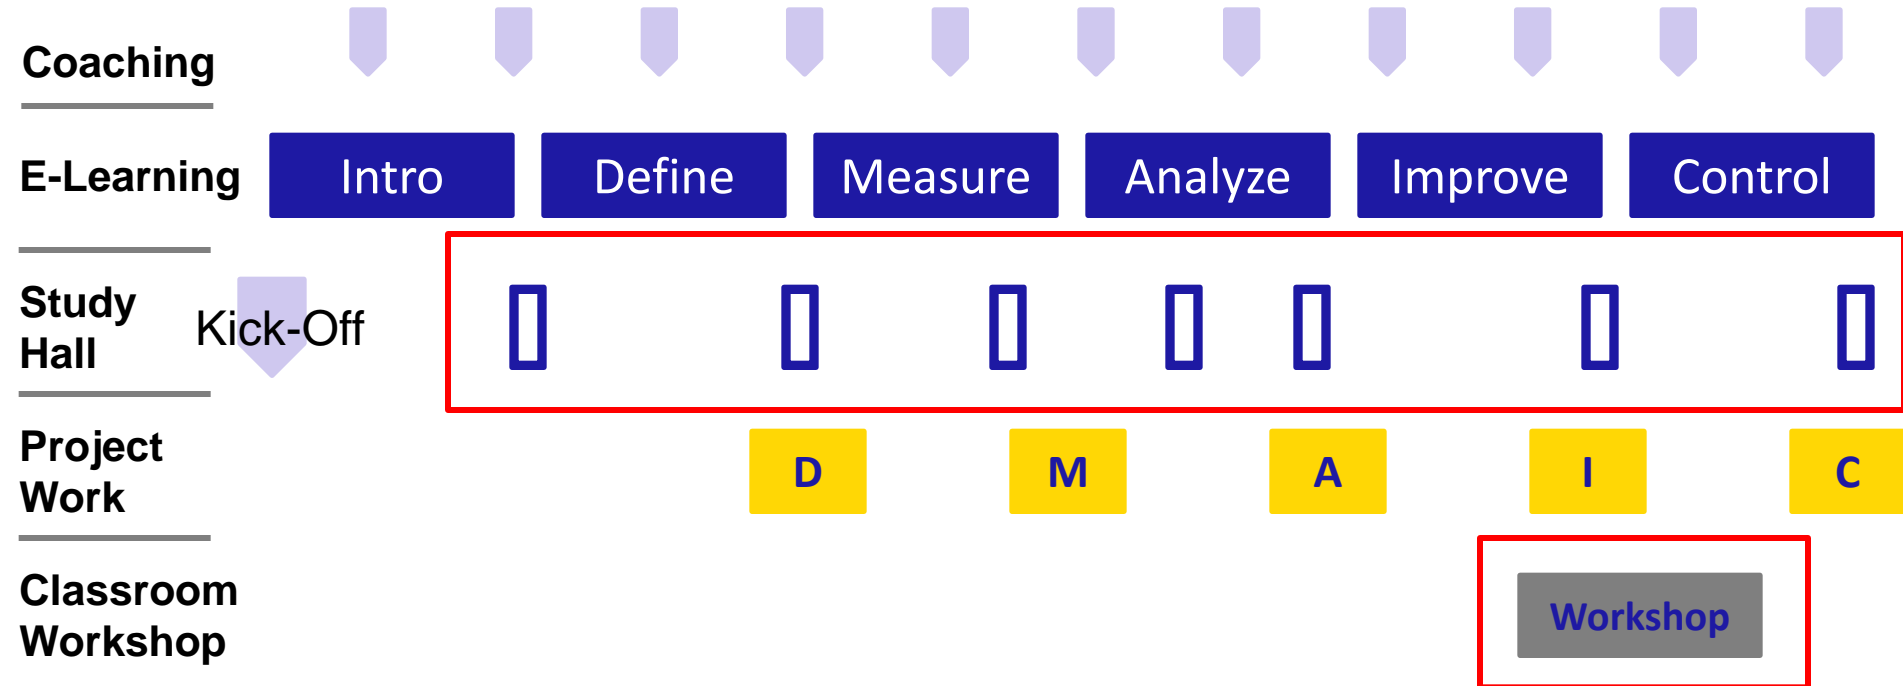

- A single storyline for a process improvement project?
- An example that shows the application and inter-relationships of many process improvement tools?
- An immersive training experience for use with a variety of classes and audiences?

***But you don't have the time needed  
to create your own materials!***

# *Ways to Use St. Sigma*

- A 1-2 day classroom workshop tool
- A threaded case study for Study Halls in a Blended Learning model
- A course capstone project
- A supplemental exercise
- A high-level example of successful project

# Blended Learning Example

# St. Sigma – Live Demo

[Introduction](#)[The Problem](#)[Getting Organized](#)[Lean Six Sigma Home](#)

*Welcome to:*

**ST. SIGMA**  
HOSPITAL SYSTEM

Like most other hospital systems, St. Sigma is under tremendous pressure to improve patient care while also reducing operating costs. The hospital's leadership is investigating new methods to improve problem-solving. The team has decided to pilot a Lean Six Sigma project in order to learn more.

 MoreSteam.com™

*The Problem* 

# Example Usage – LTS Consulting

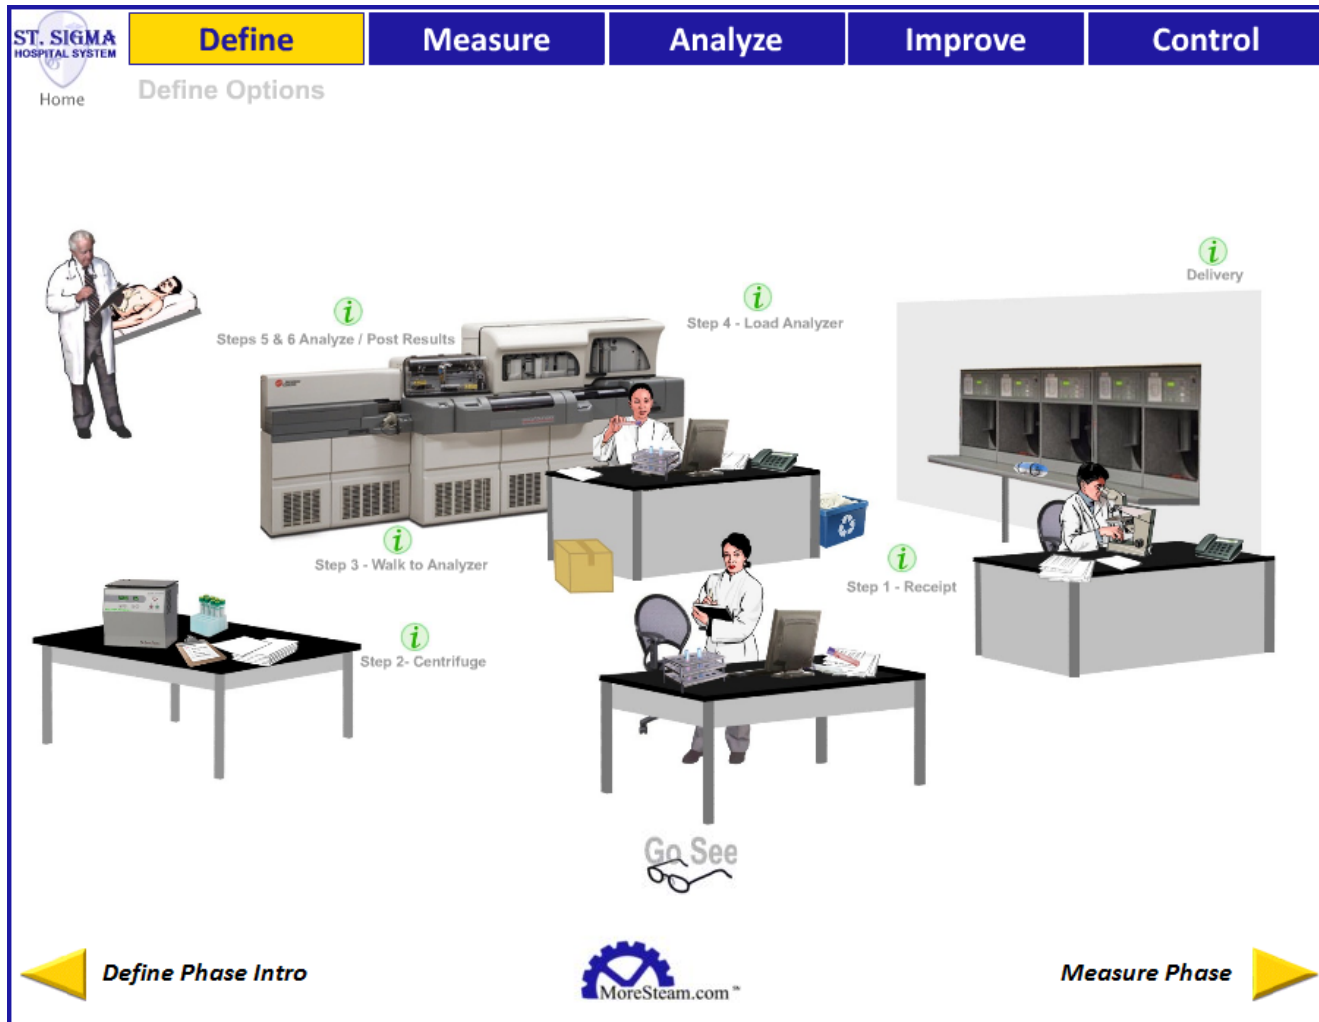

- Dale Schattenkirk, President/CEO of LTS Consulting
- Over 12 years of experience in consulting, training, development and process improvement
- An expert in transformational change who works with all levels of an organization
- Recipient of *Industry Week's* Top 10 Plant Award
- On team awarded the Lieutenant Governor's Award of the Saskatchewan Regional group by the Institute of Public Administration of Canada (IPAC)

LTS Consulting specializes in developing quality custom programs that build organizational internal capacity for continuous quality improvement through training and implementation. LTS has deep experience in healthcare including acute care, long-term care and physician practices, but has also served in industries as diverse as agriculture, service and manufacturing.

# Example Usage

# Costs & Requirements

	Instructor Fee	Student Fee	Length of Access
<b>Instructor License only*</b>	\$750	-	60 days
<b>Instructor* + Student Access</b>	\$750	\$75/student	60 days
		\$50/student if also using MoreSteam e-Learning	
<b>Unlimited Annual License*</b>	\$3,000	\$75/student	365 days for instructor, 60 days for student
		\$50/student if also using MoreSteam e-Learning	

\* License is for a single instructor and is non-transferable
